

Yoke™

Applications

Prevent shoulder drop • Elbow stabilisation • Use to unload or stabilise the shoulder joint • Subluxation due to stroke or other neurological disorders • Shoulder pain • Fractures in the humerus or clavicle • Subluxations due to injuries in the arm, clavicle etc
For resting and off-loading after arthroplastic olecranon surgery

Features

- Comfortable forearm & wrist support.
- Help prevents subluxation by applying opposing forces.
- Anatomically shaped.
- Fits contours of the trapezius and upper scapula.
- Evenly disperses pressure over the entire shoulder complex.
- Reduces pressure on the clavicle, trapezius and scapula.
- Versatile – cuffs can be removed or added to meet individual patients needs.
- Universal – fits left or right.
- Textile components are machine washable at 40°C (104°F).
